

Chokers

ref. C201010000

Adaptable chokers to any loader or excavator that have the necessary flow and pressure. Ask us and we will budget you without any commitment.

0,00 € tax excluded

Características principales

Características ampliadas

In Tymbia we have several types of chokers, all easily adaptable to mini loaders, telescopic, excavators, ... that have the necessary flow and pressure. Manufactured in high quality materials, optimal for construction work, gardening, maintenance of public roads, nurseries, ...

Chain transmission chokes are hydraulic chokes, the assembly of which is composed of a drill, the transmission system, and the coupling and hydraulic connections. Available for excavators up to 20 tm. We also have a planetary type choking and detochor choking.

If you need to increase the performance for more specific jobs, we have optional equipment: teeth for abrasive terrain, iconic drill bits, extensions to increase depth, ...

- Ahoyador with chain drive system
- Ahoyador with planetary reducer
- Chopper chiller
- 150, 250, 300, 400, 500, 600, 800 and 900mm diameter drill bits
- Optional Equipment
