Aluminum porches with wheels

The gantry crane could be the ideal solution for those spaces where mobile lifting and moving equipment are required. With its aluminum structure, they stand out for their lightness and at the same time for their robustness.

Availability of several models, from 250kg capacity up to 2000kg, with a maximum height of 4m.

- Lightweight construction
- Bolted joints
- Easy assembly with 8 screws between legs and beam
- Assembly requires 1 to 3 people, depending on model
- Flexibility of movement due to its light weight
- Hollow section gantry beam
- Guide car included
- The height below the beam can be adjusted by one person
- Detachable in three parts.
- Folding legs for transport.
- White polyamide wheels, 2 fixed and 2 wheels with brake
- Lifting speed = 8m / min

Options

- Wheels with polyurethane bandage
- 2 wheels with additional brake
- Power cord
- On request the measurements can be adjusted to your needs
- Electric or manual lifting crane
