

Anti-collision Forklift Alarm Sensor

ref. M103080021

Anti-Collision Alarm Sensor for Forklifts. The mounted anti-collision alarm sensor reversing device is an ultrasonic obstacle detection system and an essential safety aid. With up to 4 sensors that allow detecting any object within 3 meters. 60-80 ° angle detection.

199,00 € tax excluded

Características principales

Características ampliadas

Avoid dangerous situations with this safety and protection device for forklifts.

This forklift safety device has the following characteristics:

- Ultrasonic and high technology sensor system
- Easy installation
- 3 meter detection range
- Quick response time
- Water and shock resistant design
- 12/24 V
- It works very well in wet weather
- 60-80 degree angle detection sensor.
