

## Hydraulic Weighing Kit for Forklift

ref. M103110002

Weighing system incorporated on any type of truck of any brand or model. Our weighing system is specially designed for use in forklifts. Weighing in the same forklift prevents unnecessary travel, reduces movement and fuel consumption. Informs the operator of the load through a screen.

**3 759,00 € tax excluded**

### Características principales

Descripción	Kit de pesaje
Estanqueidad	Norma IP 55
Precisión (kg)	+/- 1% +/- 2% de los kg de carga
Temperatura min/máx (°C)	-20/+70

### Características ampliadas

Our kit is designed to optimize weighing operations on board the truck while handling loads. It is a cost-effective weighing system that reduces load cycle times and increases productivity in tons per hour.

#### CHARACTERISTICS

- Accuracy +/- 0.5 of machine capacity.
- 4.3-inch high brightness color resistant touch screen with ergonomic interface, easy and modern
- Store up to 50 tare values.
- Gross and net indicator.
- Summary of total weighing.
- Automatic total accumulation.
- Storage function.
- Communication via SD card and USB.
- Serial communication ports.
- Quick calibration adjustment.
- Overload audible alarm and load indicator bar.

#### ADVANTAGE

- Load accurately and be able to control the stock.
- Easy team management through a very intuitive menu.
- Weights of pallets determined for faster operation.
- Memory to save the total weight of the load, referencing each load with a different ID.
- Data transfer in safe and efficient mode.
- Printer option available here.
- Programmable alarm to warn of overloads increasing security.

- Load indicator through color bar.
- Storage of date and time of the last 10 overloads indicating operator and forklift at risk.
