Velocidad (Km/h)	4
Normativa	CE

### **Características ampliadas**

Compact semi-electric pallet truck with portable lithium battery

Semi-electric pallet truck of compact design and structure, with a maximum load capacity of up to 1500 kg, with the dimensions of its forks of 1150 x 540 mm.

Manufactured and designed to improve your experience in the transport and loading of materials. Ideal for small spaces due to its design and easy handling. An economical way to transport your packages in a comfortable and simple way.

Its structure and design facilitates the operator's use, and its maintenance is minimal. It is equipped with periodic maintenance reminders. Its vertical driving function allows the pallet truck to be operated even when the rudder of the pallet is completely vertical.

Equipped with a 20Ah portable lithium battery, you will have the

battery fully charged in just 2 hours; This battery is designed to facilitate its handling and to change it quickly. Charger included.

Highly recommended: Acquire extra lithium battery.  
[www.tymbia.es](http://www.tymbia.es)

With an extra lithium battery, thanks to its easy exchange, you can have more time for the electric function of the pallet.
