Manufactured for all makes and models of trucks or machinery for lifting loads. Easy to install without tools.

269,00 € tax excluded

Características principales

Características ampliadas

Accu-Tilt is a tilt level indicator that is made for all makes and models of elevators and lift trucks. The incorrect tilt angle of a fork lift is the main cause of product damage and damage. Even the most experienced operator has difficulties in determining the inclination of the forklifts when it enters pallets high in the rack.

The Accu-Tilt shows the operator the level of the forks at all times thus reducing possible damage by product piercing or tightness and increasing productivity eliminating unpleasant work.

In addition, the Accu-Tilt tilt level indicator also tells the operator the correct fork angle for traveling with a load, as well as parking the lift truck. It is installed in 2 minutes without tools in any truck.

SPACE NEEDED FOR INSTALLATION

FEATURES

- It shows at all times the position of the forks.
- Reduces the possibility of causing damage: this will prevent punch goods or hit shelves.
- Increase productivity as it avoids having to guess on the position of the forks.
- Easy to install using a double-sided adhesive tape.
