Hydraulic motor hammer crusher for machines from 5 to 8 tons (Backhoes and Large Loaders). Ideal for cutting grass and crushing woody material, vegetation along the margins of roads and highways, cleaning and deforestation of small plots, etc.

Our mulcher is a multi-purpose machine ideal for cutting grass, and crushing woody material, vegetation on the edges of roads and highways, cleaning and deforestation of small plots, etc.).

The machine is served with a hammer, since it is more versatile.

With our machine you have the advantage that it has belts on the shaft so that if it gets caught, it slips. It allows you to make branches of 5-6 cm, being able to crush branches of up to 9 cm in small volume.

Available in 6 widths (1000,1200,1400,1600,1800 and 2000mm)
Choose the desired width from the dropdown.
