It can be moved thanks to its 4 swivel castors with brakes, and with a maximum load capacity of 150kg.

2 145,00 € tax excluded

Características principales

Características ampliadas

Lightweight aluminum ladder designed for loading and unloading trailers and refrigerated trucks. Its maximum load capacity is 150kg and it provides the operator with maximum safety thanks to its removable 1100mm high handrail, which prevents the operator from falling off the truck during loading or unloading.

It moves effortlessly thanks to the 4 125mm nylon wheels with brake. The structure is light and robust in that it is entirely made of aluminum.

This model is the safest ladder on the market to carry out truck loading and unloading operations in complete safety. Therefore, it complies with the European standard EN 131 and is delivered together with the certificate of conformity.
